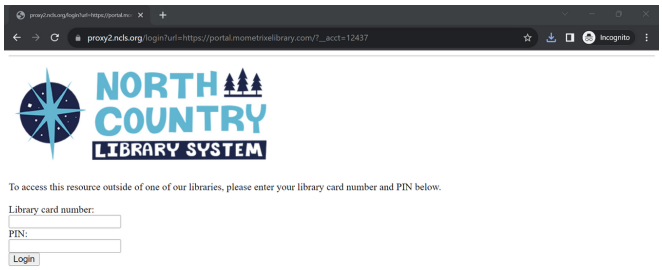
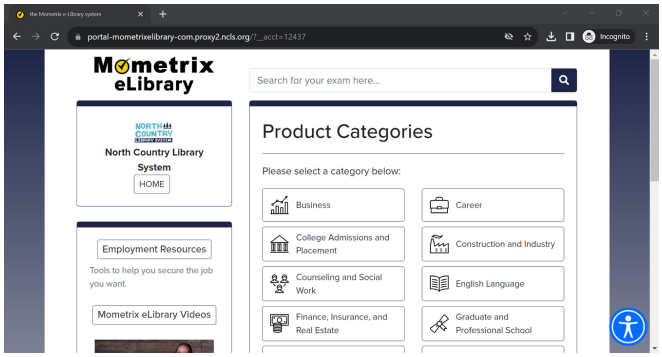
Mometrix Test Preparation

How to Guide



ACCESSING MOMETRIX

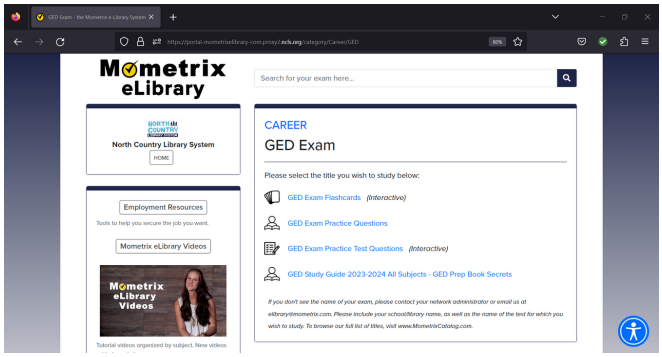
Go to ncls.org and click on the Mometrix logo in the right side column. On the page that opens, **enter your library card information** and **click the Login button** to continue.



Find your test! Search the homepage using the bar at the top of the screen or browse the options using the categories provided.

IMPORTANT: *Mometrix may not remember users from session to session; this is dependent on the setting of the user's device. It is the user's responsibility to remember where they left off in the materials. Once a browser is closed, the test results are no longer available.*

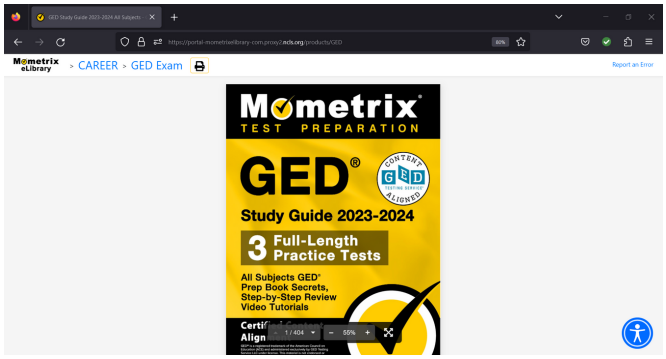
There is not an option to create any kind of separate account after you enter your library card information.



Each test will have a variety of materials available. Typically the list includes a combination of:

- flashcards that are interactive
- practice questions that may or may not be interactive
- a full-length, printable, study guide book

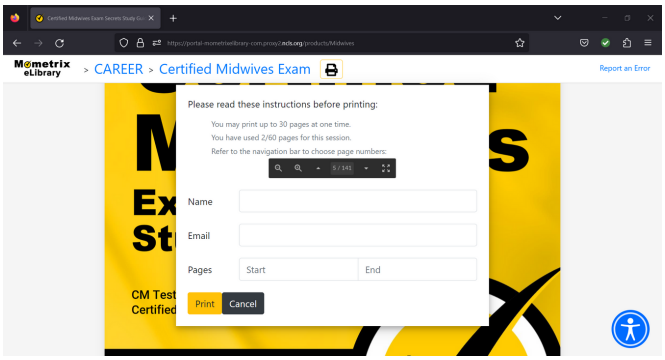
FUN FACT: USERS MAY PRINT UP TO 30 PAGES OF THE STUDY GUIDES AT A TIME!

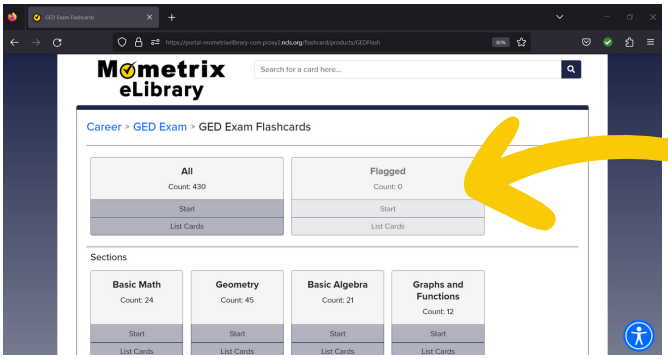


Study Guides

Users may access full-length, printable study guides for most exams! These guides are easier to keep up-to-date and are of the same quality of those available on library shelves.

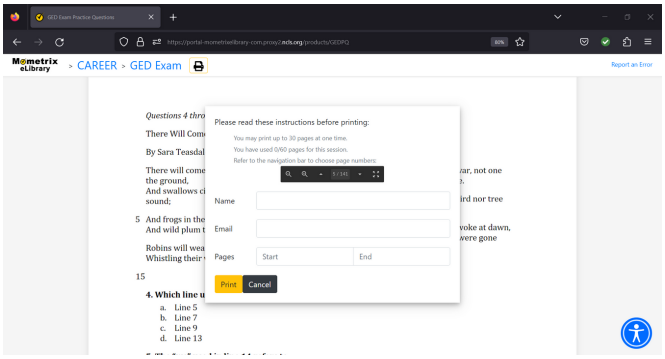
IMPORTANT: *when printing, refer to the page numbers listed in the black bar on the screen, rather than the page numbers on the white pages of the book. You may print up to 30 pages at one time, and a max of 60 pages per login session (the 60 may be composed of study guide and test pages).*





Flashcards

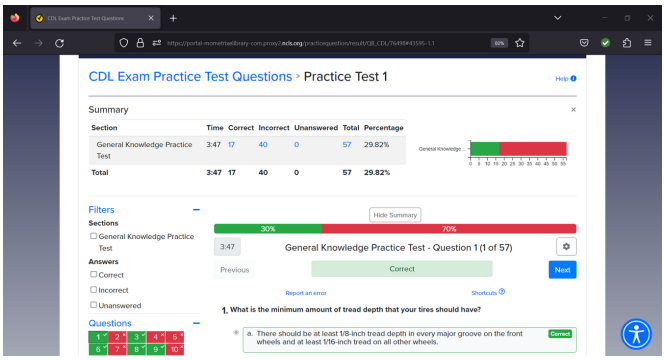
When using the flashcards, users have the ability to flag individual cards to come back to later. You can then "turn off" the flag when you feel settled on the question.



Practice Questions

The practice questions available for each test may or may not be interactive (or you may end up with both versions!).

The non-interactive version is printable, but the same rules for printing the study guides apply for printing the test pages.



Interactive tests will give you a summary of your results that includes:

- the total number of correct and incorrect answers with percentages
- the time it took for you to finish the test
- the ability to scroll through the answers and look at your selections
